

# Database persistence document - SQL

The following document is a compilation of outputs from a relational database, which is used to persist data for the project.

SQL DATABASE WITH NO DATA:

The screenshot displays the MySQL Workbench interface for 'Local instance 3306'. The 'Schemas' pane on the left shows a tree view with 'countryapp' expanded, containing 'Tables', 'country', 'Views', 'Stored Procedures', and 'Functions'. The 'Query' editor shows the following SQL:

```
1 • USE countryapp;
2
3 • SELECT* FROM country;
4
5
```

The 'Result Grid' is empty, indicating no data was returned. The 'Action Output' pane at the bottom shows the execution log:

	Time	Action	Response
26	12:42:17	SHOW DATABASES	8 row(s) returned
27	12:44:33	SELECT* FROM country LIMIT 0, 1000	0 row(s) returned

On the right side, the 'Context Help' pane displays the message: 'Automatic context help is disabled. Use the toolbar to manually get help for the current caret position or to toggle automatic help.'

### SQL DATABASE WITH INPUT DATA:
